

HomeWork #8

- 1. Try to explain the concept of hierarchical memory, how does it help the operation of computers?

HomeWork #8

2. What are the two main categories of memory according to its ability to accept writes?

HomeWork #8

- 3. What are the two types of arbitrary read/write memory (RAM) according to different design methods?
 - (a) Which one uses a higher number of transistors?
 - (b) Which one can have a higher storage density?
 - (c) Which one is faster?
